Kulwinder S Dua completed his medical training/post-graduation in India (MBBS, DMSc Internal Medicine) and fellowship in Gastroenterology and Hepatology in the UK. He passed the British MRCP examination and subsequently was elected as the Fellow of the Royal College of Physicians of both, the London and the Edinburgh colleges. In 1992 he moved to the US and joined the faculty at the Division of Gastroenterology and Hepatology, Medical College of Wisconsin, Milwaukee. He is currently a Professor in the Department of Medicine and Pediatric and is Professor of Graduate School of Biomedical Sciences. He is US board certified in Internal Medicine and Gastroenterology.

Dr Dua’s primary interest has been in advanced interventional endoscopy. He is an inventor and has several patents and FDA cleared devices.

Dr Dua has over 150 publications in peer-reviewed journals and is on the editorial board of several journals.

Recently Dr Dua was recognized in the scientific community for having re-grown the first human esophagus in-vivo using the principles of regenerative medicine (Dua et al, The Lancet, 2016).
