## Welcome Message from AMAGE President Professor Olusegun Ojo

I welcome you all – Delegates, Speakers, Members of the Pharma Industry, Exhibitors, and the Press. I congratulate the entire membership of our Association, the Africa-Middle East Association (AMAGE) that we are holding our 8th Biennial Congress despite the enormous challenges that would have ordinarily dictated otherwise.

I must, at once, acknowledge the salutary vis-a-tergo unstintingly provided me by the guiding spirit of the Founding President Professor Ziad Sharaiha and the immediate Past President, Professor Hussein Abdel-Hamid. I also salute the capable and unbreakable spirit of the President-elect, Professor Reda Elwakil, whose support has been a bulwark. I am indebted for the receptiveness and collegiality of the President of the Ethiopian Gastroenterology Association, Dr Redae Berhane and his Colleagues, Drs Tiruwork Fegadu, Kebede Tsige, Hailemichael Desalegn, and Endale Kassa, who laid the foundations of the Congress together with me when I paid the first negotiating visit to Addis in July 2016 and, who subsequently formed an indefatigable Local Organising Team, on whose sacrificial wings we have flown so far.

Having to lead the Association in the past couple of years has been a privilege which has broadened my academic horizon, increased the stable of my friends and taught me great and incredible lessons in management and administration as well as greatly expanded my sphere of influence. My friendship with the remarkably capable enigma, Chris Kassianides, of the legendary South African Gastroenterology Foundation, has proven to be the enabling bedrock for my tenure and the many emerging possibilities thereof. I thank Sandie Thomson and Karin Fenton for their wise counsel early on and for connecting me with Chris.

Coming to sub-Saharan Africa for the second of her eight Congresses – first, it was in Calabar, Nigeria, for the 6th Congress, AMAGE can be said to be fast actualizing one of her much-desired objectives – the promise of developing gastroenterology in the vast swathes of gastroenterology-naïve Africa. The symbolism of the hosting of the 8th AMAGE Congress in Addis Ababa must not be lost on us because the city is deserving of a role in this great African gastroenterology awakening having played a historic role in the political renaissance of the Continent.

Addis is also a great holiday destination in Africa and thus provides us a wonderful opportunity to mix serious academic activity with relaxation and refreshing recreation. We thank the Ethiopian Organizers, Pranapromotion, for the painstaking arrangements they have made and I would invite you to enjoy a memorable time in Ethiopia

It's indeed a pleasure for me to play host to you as the President 8th AMAGE Congress in Addis Ababa

On Behalf of the Ethiopian gastroenterology association it is my honor and pleasure to welcome you all to the Diplomatic capital city of Africa, Addis Ababa, for 8th of AMAGE. We hope that the 2017 congress will help to fulfill AMAGE mission in connecting Africa and the Middle East countries and to promote education and training on the field of gastroenterology in the region.

We have planned a comprehensive scientific program with distinguished speakers from around the world to make this a truly exciting journey of knowledge.

The venue of our congress will be at the Iconic United Nations Conference center (UNCC). Located in the center of the city with 10min drive from the Bole international Airport, the national museum where you can visit our more than 3millions year's old ancestor "Lucy" and the historic Hall of African Union, the UNCC combines architectural elegance with the very latest technology and sheer practicality to offer the ideal venue for meetings and conferences. It is also situated close to government ministries, the city's best hotels, restaurants and shopping centers.

We hope that Gastroenterologist, allied professionals and guests will have the opportunity to interact, network and exchange ideas with colleagues from the region and across the globe to improve their knowledge, clinical skills and to elevate the science and art of Gastroenterology, Hepatology and Endoscopy to a whole new level.

Good friends, a great scientific program, many sights and attractions and, of course, Ethiopians Authentic cuisines, cultural dances and performances with a unique Ethiopian coffee ceremony and hospitality awaits all friends and guests attending the congress.

Dr. Berhane Redae  
(MD, PHD)

t. Paul's Hospital Millennium Medical Collage (SPHMMC)  
After serving the nation only as a hospital for 60 years, St. Paul's opened a medical collage during the Ethiopian Millennium celebrations in 2007. So, the Ministry of Health named it "St. Paul's Hospital Millennium Medical Collage (SPHMMC). It was established through the decree of the Council of Ministers in 2010, although the medical school opened in 2007. The collage curriculum is very different from the traditional medical schools. It is the country's first undergraduate integrated modular curriculum medical education. Within a decade, the collage stretched to postgraduate and sub specialty programs. The collage has more than 2,500 clinical, academic and admin staff. While the inpatient capacity is 700 beds, more than 2,000 outpatient and emergency clients have been visiting our health facility daily. St. Paul's vision of becoming a medical university with a prestigious academic & research center, and one of the most sought medical care providers.
